

OTHER RELATED PRODUCTS

CONCRETE CARTS

- Heavy gauge steel construction
- All welded cart
- Formed top lip on all sides
- Available in 6 or 10 cubic foot
- Reinforced corners
- Various caster configurations available

FORK LIFT MORTAR TUBS

- Heavy gauge steel construction
- Available in 6 or 10 cubic foot
- All welded seams
- Forklift skids are 39" apart
- Formed top lip on all sides
- Reinforced corners

SLOPED MORTAR TUBS

- 1/2" thick steel flat bar lips
- Sloped insides for easy dumping, pouring or scooping of materials
- Narrow profile for narrow workspaces
- Available in 6,10, or 12 cubic foot
- Easy open access base for forklift

CONCRETE BUGGIES

- 6 or 8 cubic foot capacity
- Rocker arms for easy dumping
- 3 different handle options available
- All welded steel construction
- Fully pneumatic wheels
- Sloped inside for easy pouring

MORTAR PANS & STANDS

- 16 gauge steel pan
- 3 cubic foot capacity
- Pan is lightweight and nestable
- Lightweight stand
- Stand holds JMP Mortar Pan
- Stand is collapsable for easy storage

TECHNICAL DATA:

JESCRAFT BARREL CART

FEATURES

MODEL: BC-100

- Total Weight: 40 lbs.
- Bucket Height: 31.5"
- Overall Height: 43.25"
- Overall Width: 28.75"
- Overall Length: 21.5"

MODEL: BC-180

- Total Weight: 45 lbs.
- Bucket Height: 33.5"
- Overall Height: 43.25"
- Overall Width: 28.75"
- Overall Length: 21.5"

REPLACEMENT BUCKETS

18 GALLON BARREL

Our heavy duty barrel is made of 18 gauge steel with two reinforcing ribs formed into the sidewalls to help take mixing abuse. 45 degree inward sloping steel bottom prevents clumping of cement during mixing and ensures a complete and thorough mix.
Dimensions: 23" Height, 15" Diameter

15 GALLON CAGE

Our 15 gallon barrel cage is designed for use with a standard 15 gallon mixing drum. Drum fits snug inside cage and locks to prevent drum from slipping out during pouring process.
Dimensions: 19.5" Height, 15" Diameter

Designed for use with standard 15 gallon mixing drum

Model: BC-100

Model: BC-180

"Revolutionizing the construction industry..."

This heavy duty barrel cart was developed and manufactured to ease the workload of contractors at jobsites where pouring of materials is required. This mobile all-in-one station provides you with an elevated stable mixing station, a self leveling barrel that prevents tipping or splashing during transport, and a 16" long tilt-handle that makes pouring of materials effortless.

Available in 2 different models!

INTEGRATED FRAME STOP

Both model barrel carts come with a heavy duty frame stop that prevents the barrel or cage from tilting backwards during mixing and transport.

18 GALLON CAPACITY BARREL - MODEL: BC-180

This heavy duty 18 gallon capacity barrel allows more mixing space and prevents spills during transport. It also detaches from the cart allowing use of multiple pre-mixed buckets and also makes cleaning the barrel simple.

SELF LEVELING BARREL

The most unique feature of the barrel cart is the self leveling barrel. Once the cart handle is tilted backward for transport, the barrel will automatically level itself upright preventing accidental tipping or splashing of materials.

HEAVY DUTY TIRES

Every barrel cart comes standard with 16" heavy duty pneumatic tires that make transporting over difficult terrain an ease. If you prefer more durability we also offer 16" Solid Flat Free tires on both models.

16" GRIPRIGHT TILT HANDLE

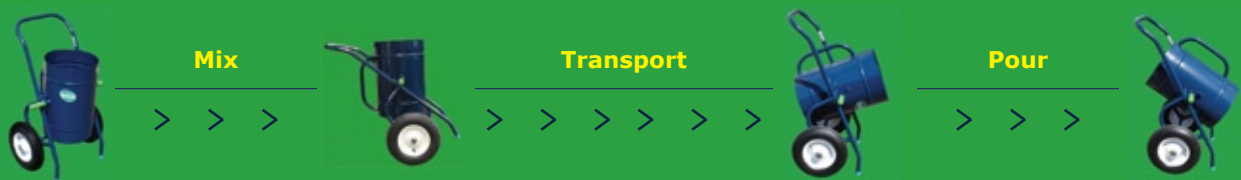

Both barrel carts feature our 16" long "GripRight" tilt handle. This longer vertical handle allows additional grabbing points along its length which gives the operator better control of the barrel during the pouring process.
