New Products

PRO-LITE Drywall Carts *Jescraft*

Jescraft expands its offering of heavy-duty drywall carts with the introduction of the PRO-LITE professional line, an ultra-lightweight line of 16 drywall cart models. The new carts feature an all-welded tubular steel frame that reduces weight by 30% without sacrificing strength and stability. There are two deck types to choose from: heavy-duty steel plate or replaceable, impact-resistant ¼-in.-thick UHMW polyethylene. Decks are available in 12- and 18-in. sizes, with 20-, 24- and 28-in. widths and three bumper styles.
