FOR IMMEDIATE RELEASE

**JESCRAFT INTRODUCES NEW LINE OF
“I” STYLE MULTI-PURPOSE CARTS**

Bogota, N.J. (May 2, 2013) -- Jescraft expands its offering of heavy-duty carts with the introduction of the “I” Style Multi-Purpose Cart.

The MPC feature an all-welded tubular steel frame that reduces weight without sacrificing strength and stability. The “I” style design allows for easy cornering through doorways and tight spaces. The backbar uprights in place, the cart easily handles drywall, sheetrock, and all other types of panels. Mostly importantly, the backbars can be easily removed and conveniently stored flat in rear of deck. Once stored, the MPC can be used as a flat dolly or cradle dolly to transport heavy stacks of materials, pipe, tubing and barstock with the assistance of optional steel stakes. The front load area has a series of weld nibs gripping stacked materials.

The Jescraft “I” Style Multi-Purpose Cart is available with easy-rolling, 8” x 2” mold-on rubber or polyurethane swivel casters for enhanced maneuverability over all types of surfaces with one multi-position lock. Smooth and non-marking, these polyurethane high-performance casters provide a cushioned ride that helps deflect floor debris such as fasteners or metal shavings.

The decks of a MPC can carry up to 3,000 pounds and weigh 66 to 79 pounds depending on the casters.

Multi Purpose Cart with 8” polyurethane swivel casters w/ 1 multi-position lock	48” L x 27” W x 47” H Flat Dolly Height 11 ½”	66 lbs	3,000 lbs
